COMPLETING THE INSTALLATION OF THE **INSO FLOORING**

ISSUE: JULY 2019

DO NOT USE SOLVENT ADHESIVE TO ADHERE  
INSO FLOOR TO ANY SUBFLOOR.

- Use water based or acrylic adhesive to adhere INSO flooring to any subfloor. Any adhesive except for solvent based adhesive can be used. INSO Group recommend our INSO bonding product for this application. (Please ask for details)
- Ensure no sharp edges or rough surfaces touch the white underside of the INSO floor.

When the ramp is cleaned and ready for installation, apply the INSO bond.

Use a 2mm trowel to evenly spread the INSO bond.

- Use a new knife blade to cut the INSO floor to the right (mat) size if needed.
- Make sure you leave a 4mm gap around the edge of the INSO floor to allow the mastic to seal the floor and prevent water ingress.
- Once the INSO floor is installed, a cork board must be used to ensure no air bubbles are trapped under the INSO floor. Start from the middle of the INSO floor and work the cork board to the edges.

Use masking tape to isolate the edges of the INSO floor area to which you need to apply mastic.

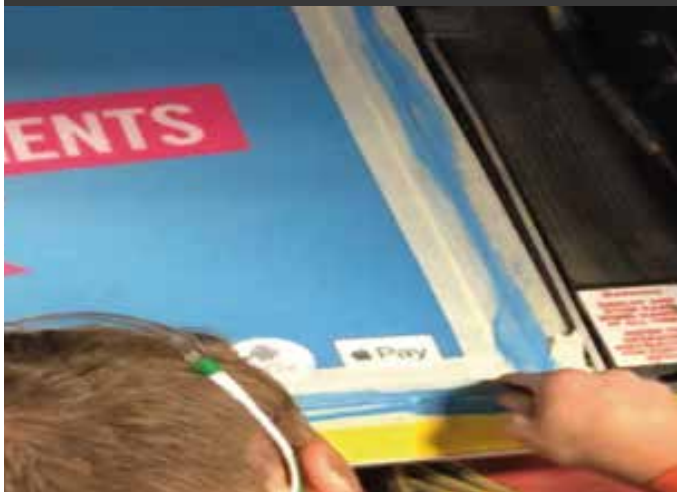

Seal the outer edge of the INSO floor with mastic sealant. Colour match to background colour or select contrasting complementary colour. *(Please ask for details)*
